Dear Paige

Volume of primary dolphin pool at Dolphin Marine Magic

You have request a statement in relation to the primary dolphin pool at Dolphin Marine Magic.

As you are aware Condition S1 of Permit P01635 authorising your company's exhibition of Indo-Pacific Bottle-nosed Dolphin (*Tursiops aduncus*) requires your company to comply with the requirements that apply to the exhibition of Bottle-nosed Dolphins (*Tursiops truncatus*) set out in the *Standards for Exhibiting Bottle-nosed Dolphins (Tursiops truncatus) in New South Wales* published in April 1994.

The supplementary information that you provided today satisfies me that the primary dolphin pool at Dolphin Marine Magic currently has a water volume capacity of at least 1700 m³.

The primary pool volume at Dolphin Marine Magic therefore complies with the requirements for six (6) dolphins prescribed by Clause 2.4.4 d) i of the *Standards for Exhibiting Bottle-nosed Dolphins (Tursiops truncatus) in New South Wales*.

Yours sincerely

Matthew Crane
Leader, Exhibited Animals
