To whom it may concern,

In 2014 Southern Cross University collaborated with Dolphin Marine Magic to investigate the sea turtle stranding in NSW, Australia.

The project produced an Honours thesis titled "Epidemiology of sea turtles stranding along the mid-north coast of NSW, Australia: Investigations into natural and anthropogenic causes"

The project was supervised by Dr. Sander Scheffers and Dr. Duan T. March and co-funded by the Coffs Harbour Animal Rescue Trust (CHART).

With kind regards,

Dr. Sander Scheffers
